Tokyo, Japan

DEAR HENNGE TEAM,

Japan has always been one of my destination to live in the future. The discipline and togetherness of the Japanese people is unmatched. They value their work and time the most. I have been doing front-end development for 2 years and created some responsive and cross browser compatible websites. I always love transforming beautiful UI designs to life and see people using them with comfort and please.

I have worked on projects like empire with slick and minimalistic design where responsiveness plays a key role. I am passionate about learning new techniques and tricks so as to increases my knowledge and effectiveness every day.

In addition to this, I am aiming to become a full-stack developer who will be able to smoothly handle the front-end as well as back-end.

I love watching football matches and one such incident like Japanese people cleaning the stadiums after the match was really inspiring and I am like I have to go there.

Please feel free to email me or call me at +9779840427954. I hope to hear from you soon.

Sincerely,
Bheart Shrestha
